

# Infinity AI Copilot

Generative AI Assistant that Accelerates cyber security operations by up to 90%

With the shortage of 4 million cyber security practitioners worldwide, IT and security leaders are struggling to maintain an acceptable security posture for their organization.

## Supercharge your Team with a Generative AI Assistant

Allowing IT and security teams to exponentially improve their productivity with their current resources, Infinity AI Copilot is an expert generative AI assistant that saves up to 90% of the time needed to perform common tasks. Automating multi-step and complex security activities, Infinity AI Copilot assists administrators and security analysts alike.

### Empower Admins and Support

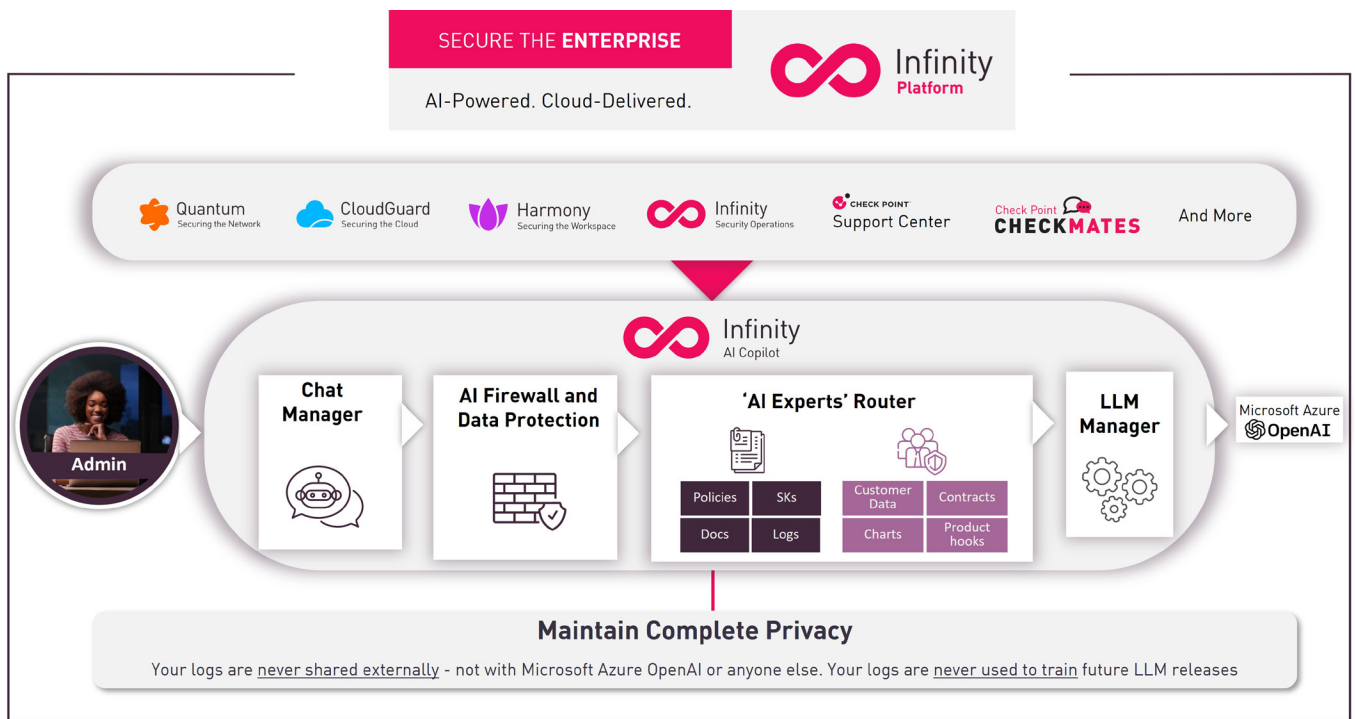

Infinity AI Copilot knows your organization's policies, access rules, objects and logs, as well as product-specific documentation, enabling it to provide contextualized and complete answers to your prompts, as well as perform:

- rapid policy updates
- fine-tuning of security controls
- speedy trouble ticket resolution
- and more

### Enable Security Analysts

Slashing the mean time to respond (MTTR) to security incidents, Infinity AI Copilot simplifies the work of security operations analysts through:

- AI-guided incident response
- Large scale threat-hunting
- Automated writing and running of playbooks and other tasks

## As Easy as Writing a Prompt

Interacting with Infinity AI Copilot is as natural as having a conversation. It understands and responds via chat in any language, making it easier for practitioners to communicate and execute tasks.

### Network administration and troubleshooting

Tell me why John cannot access Salesforce as described in Jira ticket DEV-345.

### Security Operations

Is my network protected from CVE-2023-42793?

### Endpoint Security

Are all endpoints protected with Check Point anti-ransomware?

### Mobile Security

I need to protect the mobile devices of all our new Texas office employees. What are next steps?

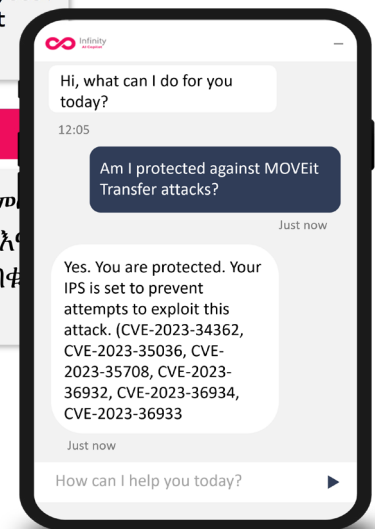

## Multilingual Support

Beskytter IPS-en min mot de siste sårbarhetene?

最近ファイルレス攻撃を経験しましたか？

O zero-phishing está ativado para todos os endpoints?

የእኔ ሞባይል መሳሪያዎቼ ስር ከመስራት እና ከማሰር የተጠበቁ ናቸው?

## Privacy-by-Design Architecture

By partnering with Microsoft Azure open AI, Check Point leverages advanced AI to set new standards in cybersecurity, enhanced with its own proprietary prompt engineering and unique ability to protect the LLMs from critical vulnerabilities. Maintaining complete customer privacy, your raw logs are never shared externally - not with our partner Microsoft Azure OpenAI or anyone else, nor is your data saved to train any future LLM releases.

## Why settle for 10% capacity? Test Drive Infinity AI Copilot today

### Using Smart-1 Cloud?

Unlock unprecedented efficiency and accuracy for administrators and support professionals with Infinity AI Copilot. [Join the Preview Program today.](#)

### Using Horizon XDR?

Get more done with less time and effort for all security operations across investigation, analysis, playbook automation and threat hunting. [Sign up for the Preview Program.](#)
